Kim Schrader Fauth ✦ Quilt Teacher and Presenter

Kim Fauth has been teaching quilt classes for approximately 15 years but has been quilting for over thirty years. A former math teacher, she is an expert at explaining material so it makes sense. When she came up with the new ABCD Technique, she shared it with her Monday quilting group. They strongly encouraged her to write a book because the technique was so new and different. The technique involves making 32 blocks in only three hours and then using those blocks to create something unique. There is no set pattern so you can create wall hangings, bed quilts, purses, tree skirts, and the list goes on!

ABCD Quilting has step-by-step directions for making the 32 ABCD Blocks that will be used in the design process. The blocks are made in three steps by sewing on the diagonal and the sides in a specific order. No paper piecing, special rulers or templates are needed. The second part of the book explains how to use those blocks to design. The book includes approximately 40 pictures of various quilts.

Six-hour Workshop -
Students will come to class with 5" squares precut according to the Supply List. The first three hours will be spent sewing the 32 blocks using the ABCD Technique. During lunch there will be a mini trunk show describing how to design using the blocks. The time after lunch is spent squaring the blocks and designing.

Kim is a native of Illinois but has lived in Colorado, Idaho and Arizona. She recently moved to Manitou Springs, Colorado. When she isn't teaching quilting, she tutors children in mathematics and travels as much as possible.
